

## Novatred Entrance Matting

Novatred Entrance Matting is an attractive dirt barrier designed to capture walked-in dirt and moisture at building entrances.

Novatred Entrance Matting was developed after years of close involvement in the matting industry, to provide a designer style mat which gives a soft but sturdy feel underfoot, whilst working to remove both dirt and moisture without the excessive noise normally associated with this type of matting.

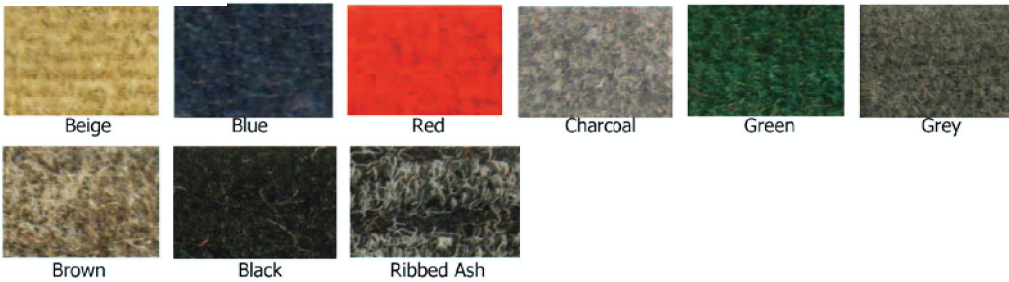

**Novatred 2000:** uses high quality nylon cut pile matting insert (excellent clean-off properties) and has a five year warranty.

**Novatred 1000:** uses an economical carpet insert (good U.V. resistance) and has a two year warranty.
