

Gloss retention of curtain wall cladding products -based on white the most stable colour.

THIS GRAPH is an opinion based on manufacturer's data, graphs and Accelerated weather testing in various laboratories .It is also based on projects in Perth CBD with visual signs of gloss loss. All this information is available .This graph is designed to ultimately show how PVF3 outlasts all other varieties of paint finish although it carries no exact data which can be used as proof for warranty claims. It is an indicative opinion and for comparison purposes only.
