BUILT FOR AUSTRALIAN CONDITIONS!

- All NovaWood finishes meet both the global AAMA standards and Australian AS 3715 standard.
- Aluminium is a non-combustible material which makes it a natural choice if you live in bushfire-prone regions.
- Maintenance free - products do not require oiling, painting or coating over the life of the product – just simply keep it clean for long lasting finishes.
- Beautiful timber look finish.
- Completely safe without harsh chemicals used
- Concealed fixing through aluminium extrusions, for a clean finish without the need for pre-drilling.
- Hard wearing - An extremely dense and impact-resistant product.
- Rot & Pest Resistant - Guaranteed not to rot, split, warp or check. Highly resistant to damage caused by termites & fungal decay.
