

## C140SME BOLLARD $\phi$ 140mm - GALVANISED AND POWDER COATED

### FEATURES

- Economical alternative when heavy duty models are not necessary
- Removable plastic moulded caps
- Standard class 1 red reflective band
- Fully welded heavy steel base plated models
- Welded anchoring bars for fixing into concrete footing

### FINISHES

Hot-dipped galvanised and powder coated safety yellow

### WARRANTY

12-month installation warranty | 12-month on product

### DESCRIPTION

Our builders range bollards are available in either surface mount or below ground models in 63mm, 90mm, 114mm or 140mm diameters.

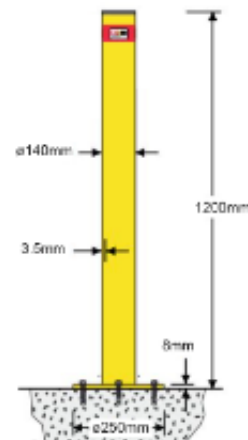

They are designed for lighter duty applications such as zoning off areas or pedestrian management.

The surface mount models come with fully welded base plates and fixings while the below ground models have welded starter bars for setting into concrete footings. All models are hot dip galvanised after manufacturing and come with a removable black plastic cap. The standard powder coating colour is safety yellow, but other colours are available on request.

Optional chain rings are available for connecting chains or ropes. Chain ring-kits are sold as pairs and can also be purchased separately for retro fitting to existing bollards by drilling and tapping M10 threads as required.

TYPE	C114SME
RANGE	Galvanised and powder-coated
DESIGN	Surface Mounted Economy
MATERIAL	Mild steel
WEIGHT	18.4 kg
DIMENSIONS	Height: 1200mm 140mm Dia. Wall Thickness: 3.5mm

### MAINTENANCE

Check our cleaning and maintenance guide for this product on page 2.

## CLEANING & MAINTENANCE

Our Bollards are not only functional but also add a touch of elegance to any environment. To maintain their pristine appearance and extend their lifespan, regular cleaning is essential. Follow these simple steps to properly clean your stainless steel bollards:

1. Gather the necessary supplies:

- Mild detergent or stainless steel cleaner
- Soft non-abrasive cloth or sponge
- Bucket of warm water
- Microfiber cloth or towel
- Protective gloves (optional)

2. Prepare the cleaning solution:

- Fill the bucket with warm water.
- Add a small amount of mild detergent or a specifically formulated stainless steel cleaner according to the manufacturer's instructions.
- Mix the solution until it creates a soapy mixture.

3. Clean the bollards:

- Dip the soft cloth or sponge into the cleaning solution and gently scrub the stainless steel surface of the bollards.
- Pay extra attention to areas with visible dirt, stains, or fingerprints.
- Avoid using abrasive cleaners or rough materials that may scratch or damage the surface.

4. Rinse the bollards:

- Rinse the bollards thoroughly with clean water to remove any soap residue.
- Ensure all cleaning solution is completely washed away and dry them after if possible.

5. Regular maintenance:

- Schedule regular cleaning sessions to prevent the build-up of dirt and grime.
- Depending on the environment and usage, a monthly or quarterly cleaning routine is typically recommended.

By following these cleaning guidelines, you can maintain the pristine appearance of your stainless steel bollards and ensure they continue to add an attractive touch to your surroundings.
